

STYLING APPROACH

CSS Modules / plain CSS

Tokens live in :root custom properties and are used by every React component.

COLOUR TOKENS

--color-primary

primary workout action

#7F1D1D

--color-accent

muted earthy detail

#A68B6B

--color-bg

soft-black background

#0F1113

--color-surface

charcoal panels

#1A1D20

--color-text

warm off-white text

#EEE8DF

Contrast checks

Text / red 8.23:1

Earthy accent / background 5.88:1

Text / surface 13.90:1

TYPE SCALE

Heading

Workout Log

28px / 700

Body

Record each working set as you train.

16px / 400

Small labels, captions, and footer

14px / 400

SPACING RULE

Base unit: 8px

8px

16px

32px

--space-1

screen edge

--space-4

tight

phone

sections

Desktop screen edge padding: 32px

One 8px-based scale keeps gaps, margins, and padding consistent.

REUSABLE COMPONENTS

ATOM

Button

Log workout

Cancel

Props: variant, onClick, children, disabled
44px minimum touch target on phone

ORGANISM

HeaderNav and MobileBottomNav

IronBase

Dashboard

Workout Log

Exercise History

Workout History

Home

Log

History

Workouts

Props: currentRoute, navigation items

MOLECULE

ExerciseSelector

Choose exercise

v

Props: exercises, value, onChange

MOLECULE

WorkoutCard and LoggedSetRow

Bench Press

Weight | Reps | RPE

Edit

Props: workout or set data, onEdit, onDelete
Used in Dashboard, Workout Log, and Workout History.

ATOM

FormField

Label + linked input. Used wherever workout data is entered.

RESPONSIVE PLAN

Below 768px - phone

One column. Dashboard cards, workout fields, and history rows stack. Horizontal header navigation becomes the bottom navigation.

375px rule: no horizontal scrolling; all controls stay within 16px edges.

768px and above - desktop

Horizontal header navigation returns. Dashboard and Exercise History use two content columns; Workout Log keeps a roomy input and logged-sets layout.

Desktop screen edges use 32px padding.

ACCESSIBILITY CHECK

**Contrast**

All planned text pairs meet at least 4.5:1.

**Semantic structure**

Use header, nav, main, button, and form elements.

**Images**

Meaningful images get alt text; decorative images use alt="".

**Inputs**

Every input has a matching visible label and id.

**Keyboard**

Every link and button is reachable and has a visible focus state.
